MODEL PROJECT PROFILE ON CANE FURNITURE

1. Introduction

Canes have been exploited by man for centuries. Their properties of toughness, strength, flexibility and elasticity have made them useful for many purposes. While canes are normally used for furniture, hats, baskets, walking sticks, fishing rods etc, in some areas, suspension bridges are made entirely of Cane.

Cane splits are used for basketry and extensively used for tying and binding. Canes are of cylindrical and of uniform thickness, solid, straw-yellow to brown in colour and are more or less covered by spring leaf sheaths.

Easy moulding capacity of cane is a added benefit for the artisans who really like to create their own creations. Considering all these reasons, cane is very useful to make furniture and other utility items.

2. Plant Capacity per annum

Items	Quantity
1) Sofa with Centre Table	206 Set
2) Repairing Work	86 Set

3. Market & Demand Aspect

There is un-ending demand of the product in domestic and international market. Different designed furniture and utilities are exported to other countries. There is also good demand of the product in our domestic market. At present it is also used for Interior Decoration of house, commercial places like hotel, office etc. in India and abroad. Different artistic work of cane products made by Indian artists and craftsman are sold both in domestic and International market with high appreciation.

4. Raw Materials

The raw materials required for manufacture of Sofa set with centre table are Assam Cane Stick, Assam Galla Cane Stick, Sundi Cane, and Cane Tar along with assorted Nails. For Centre Table top, Glass is used. For polishing the furniture, polishing materials like Gala, Sprit, Sand paper etc. are used. All the above raw materials are available locally.

5. Manufacturing process & Source of Technology

Production details and process of manufacture of cane sticks are available in different qualities for making the cane furniture. Furniture are designed by designer and the craftsman follow the design. Some times they built it from their ideas. Basically cane sticks are required for structuring of cane furniture. Nails, fevicol, cane wire/tar are used for binding the sticks together. After that polishing materials used for polishing the furniture for better look. The manufacturing of sofa set with centre table are also done on job work basis by merchant manufacturer and exporters. Artisans are increasing on these products through their own new designed creations.

6. Basis of Project Selection

There are good numbers of manufacturers of cane furniture situated around Kolkata. Expert craftsmen are available here at a lesser cost in comparison with other metro cities. Basic raw material i.e. cane is available mainly in eastern India like Assam and they are easily available in Kolkata market. More over ports are available in Kolkata which helps export to other countries.
